At Patrick Industries, we pride ourselves on delivering customer-focused solutions that elevate the experience for boat builders and outdoor enthusiasts alike. Our Marine presence continues to deliver innovation and value-added products to our OEM and aftermarket customers, ensuring we meet the ever-evolving needs of the industry.

With over 30 leading brands empowered by Patrick, we are a trusted partner and supplier of choice, dedicated to bringing your vision to life. We continue to prioritize designing and delivering innovative, higher-engineered products, while expanding our portfolio of offerings. Our commitment to innovation and service, combined with the incredible range of capabilities and components offered through our Full Solutions Model, allows us to meet the unique demands of our customers. Together, we're building on a legacy of expertise to advance the marine industry of tomorrow.

FULL SOLUTIONS MODEL

Categories are representative of Patrick's broad range of capabilities and component solutions. Contact us to learn what we can do for you. www.patrickind.com

From product design and development to aftermarket accessories, our brands deliver added value through innovative, highly-engineered component solutions.

Patrick's full solutions model empowers manufacturers, resellers and aftermarket providers with everything they need. From hull design and development to T-tops and watersports towers, our industry-leading combination of materials and service will give your product the competitive edge, in even the smallest of details.

New Marine Products

Patrick is proud to showcase the latest products from our leading Marine brands. Each is a testament to enthusiast-driven innovation that sets a new benchmark for excellence in the marine industry.

FLORIDA MARINE TANKS

Florida Marine Tanks has been a marine leader in both OEM aluminum and rotationally molded fuel, water, and waste tanks since 1974. Florida Marine Tanks is committed to building the safest, highest quality, and most competitively priced tanks in the industry, coupled with dedicated engineering support and award-winning customer service.

1.5" O.D x 90 Degree Injection Molded Bolt-On-Fill

- Glass-reinforced nylon construction removes the need for grounding the fill
- New design moves ICV to bottom side of fill. This allows for better flow during the filling process

One-Piece Injection Molded Nylon GRV Valve

- Reduces number of leak points on GRV fitting by eliminating threaded barb fitting

LLDPE Water & Waste Tanks

- Spin weld capabilities for simple relocation of fittings
- Waste tanks for toilets – accepts manual or electric flush toilet designs
- Integrated assembly only requires water inlet from boat for flushing on waste tanks

Introducing a state-of-the-art Marine-grade windshield from Geremarie. Gereglass is crafted to the highest standards with cutting-edge innovation in manufacturing, design, and integration.

Engineered for durability and clarity, this windshield offers a seamless experience, enhancing both functionality and aesthetics. The design of our windshields ensure superior performance and a sleek, refined look for your vessel.

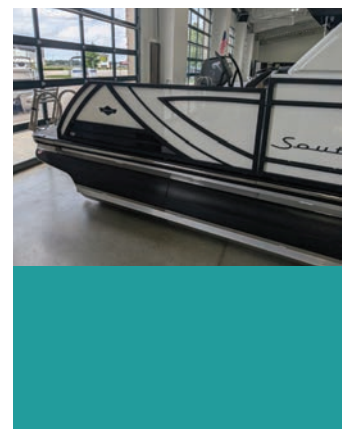

GG Schmitt, a trusted leader in high-quality marine hardware and custom metal fabrication, has addressed common consumer frustrations with marine bulwarks by developing a cutting-edge system designed for ease of use, durability, and customization.

- Available in electric or hydraulic configurations
- Proprietary sequence controller
- Holistic system with internal ladders, hinges, and removable railings
- Integrated actuators for hassle-free installation
- Aqua met pivot and locking shafts
- Strong construction options in aluminum or stainless steel
- Designs tailored to OEM requirements

Available in electric or hydraulic configurations, the system integrates seamlessly into vessels with its proprietary sequence controller, ensuring smooth operation every time. With strong construction options in aluminum or stainless steel and designs tailored to OEM specifications, this system delivers both functionality and aesthetic appeal, setting a new standard for marine bulwark innovation.

The patented Fishmaster T-top is an aftermarket product designed to accommodate low bridge clearance and garage-storage of the vessel.

- The Original Folding T-Top™
- Angler Approved™ Patented Design
- Universal & Simple Installation

www.fishmaster.com

Monster Tower specializes in designing and delivering superior watersports towers and accessories to outfit virtually any boat for whatever you want to do.

- Invented the Aftermarket Wakeboard Tower
- Over 50,000 Towers Sold Globally
- Industry Leading Wake Tower Designs

www.monstertower.com

TurboSwing's patented technology elevates the tow rope above the wake without using up valuable real estate inside the boat.

- Patented Outboard Engine Towbar
- The Only Tube-Rated™ Solution for Boats Universal Design & Simple Installation

www.turboswing.com

Fishmaster Pro Series Folding T-Top

The Pro Series T-Top has been trusted by OEMs and serious anglers for years as their shade solution for center console fishing boats.

With its patented design, the Fishmaster Pro Series T-Top is the only boat t-top that folds twice (once at the side supports & once in the truss-style canopy frame) for storage, low clearance areas (bridges, garages, etc.), and keeps your t-top out of sight to remain compliant with your Home Owners Association (HOA).

The marine-grade UV-resistant Sunbrella® fabric used in the t-top's canopy is considered the best in the boating industry.

Monster Tower MT7 Wakeboard Tower

Turn any boat into a wakeboarder's dream with the MT7 - the most universal aftermarket wakeboard tower ever designed.

TurboSwing Ski Tow Bar

Whether you enjoy wakeboarding, tubing, water skiing, parasailing, or all of these, TurboSwing is an exciting new way to experience towed water sports behind outboard powered boats.

Marine Concepts designs, engineers, and manufactures CNC plugs, composite molds (open and closed molded), and CNC direct molds for boat manufacturers as well as a wide variety of industrial composite manufacturers.

Marine Concepts also produces FRP/CFRP parts and assemblies for the marine and industrial markets. Marine Concepts is an industry leader in composite tooling development producing patterns and molds for the majority of U.S. fiberglass boat manufacturers.

Single use Direct Mold

- Marine Concepts offers a hard-coated EPS (Expanded Polystyrene) mold which supports rapid, cost effective, "one-off" composite part fabrication.
- Ideal for prototyping stringers, consoles, seating modules, etc., and parts of any size or shape.

Continuing to Innovate

New Products at IBEX

Magnetic SeaDek

Lighted SeaDek

SeaDek was founded to help boaters by challenging the status quo, breaking norms, and experimenting with new materials to continuously improve the way people connect with their boats. At IBEX, innovation will be on full display as we showcase two new products that once again disrupt the flooring industry and raise the bar within our segment.

Answering calls for a removable SeaDek kit without the constraints and concerns associated with snaps, we are thrilled to unveil our new Magnetic SeaDek system. This all-new installation method employs ultra-strong magnets to form a secure bond to a boat's deck, while allowing easy removal for cleaning, winterizing, or trips where SeaDek is not desired.

Sharing center stage at IBEX is our new Lighted SeaDek, which won an innovation award at this year's Miami International Boat Show. By incorporating a lighted base layer, custom routing in the top layer(s) exposes vibrant illumination of whatever patterns and logos you can imagine, unlocking an entirely new outlet for creativity and expression.

At the end of the day, we are proud of what we can offer our customers: superior quality, a dependable supply chain, and new products that continually push boundaries within the industry.

www.seadek.com

Sea-Dog has been a trusted name in the marine industry since 1923. Holding strong to their commitment of innovation and excellence, Sea-Dog has an exciting offering of products that continue to push industry standards.

As the leader and award-winning manufacturer of marine hardware and components, this year's offering is another example of Sea-Dog's prestige in the industry.

Dripper Guard Thru Hull

Dripper Guard prevents boat hull stains caused by water dripping from thru-hull drains. It's perfect for any component on your boat that has a thru-hull. Ideal for preventing stains from air conditioner, sink, generator, shower, bilge pump, bait well, and sump pump thru-hulls. Forget the boat hull cleaner and make your boat maintenance a breeze with Dripper Guard. Patent Pending.

Linear Folding Cleat

The Linear Folding Cleat features an innovative design incorporating a unique folding mechanism that greatly reduces required surface area and offers a streamlined appearance that is both sleek and functional. Mounting is achieved using removable carriage bolts vs. welded studs, making bolt length choices easy for the customer. There is no need for a large custom cut out installation hole. Bore 2 - 5/16 fastener holes, place chosen length carriage bolts into end slots, then close the cleat to hold fastener in rigging position for installation. Water and debris pass through, reducing corrosion and wear to cleat. Incorporates a positive snap locking feature: simply pull-up to open and press down to close. Accommodates up to 1/2" line. Low profile ergonomic design when closed limits trip hazards and line snags. Constructed of corrosion resistant investment cast 316 stainless steel. Patent Pending.

Dampening Butt Hinge

The Dampening Butt Hinges consist of two leaves with a Teflon coated pin that produces a very precise, low friction movement for a very high end feel with anti-rattle properties. Designed to attach to abutting surfaces of a door and door jamb or to be mortised for a flush installation. Constructed of corrosion resistant stamped 304 stainless steel. Installs with #8 FH fasteners (not included). Patent Pending.

Pontoon Boat Mini Compact Low Tone Horn W/ Bracket

At 111 decibels and a frequency (Hz) of $330 \pm 20A$, this Pontoon Boat Mini Compact Low Tone Horn meets US Coast Guard's COLREGS and ABYC standard A-23 for use on vessels under 12m (39'). Constructed of powder coated steel with corrosion resistant 304 stainless steel bracket for easy mounting. Recommended for freshwater use. NMMA Type Accepted #2601746. 12VDC.

LED Navigation Lights

LED Nav Lights with a sleek and modern look. Combo Bow Light, Top Mount Side Light, and Side Mount versions are available with stainless and black covers*. 2NM, ABYC C-5/A-16 Compliant. *Custom colors available on large volume orders.

Electrical

Sea-Dog carries a complete line of NMEA electrical products in addition to our robust electrical product offerings.

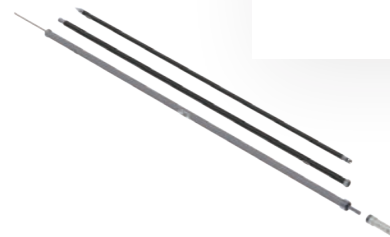

Founded in 1959, TACO is an established marine manufacturing full-service enterprise – providing boat builders and end users with top-quality products in Sport Fishing, Rub Rail, Shade, Seating, Upholstery & Hardware, LED Lights & Electronics, Canvas & Tower Fabrication, Hinges & Latches, Boating Accessories and so much more.

For 65 years, we've taken our passion for the marine industry to become a leader in innovation. Whether it's custom designs, extrusions or finished parts, we use the latest technologies and in-house testing to provide product solutions that meet or exceed our customer expectations.

Open Water Internal & Collapsible Carbon Fiber Outrigger Poles

Introducing the Open Water Internal & Collapsible Carbon Fiber Outrigger Poles for the ultimate in sport fishing. Unlike other internal, triple-rigged poles on the market that are fixed or challenging to setup and take down, these poles can be collapsed quickly and with ease for transportation and storage. Our 3-piece design features a patent-pending latching mechanism that provides a Twist & Lock connection between each pole segment. Another innovative feature of these internally rigged poles is the ability to perfectly index the halyard line using the adjustable ratchet base with a threaded locking collar. This design element eliminates chafing and ensures the smooth ascent and descent of outrigger lines. Additionally, each halyard line has its own patent-pending internal tube running the length of the pole to its exit point that ensures smooth line operation with no tangling. Each pole is also labeled as port or starboard to simplify the installation process. Compatible with all standard 1-1/2" outrigger mounts, these poles come internally rigged with premium 400-pound mono halyard line in three distinct colors for easy identification of use – eliminating exposed hardware.

Grand Slam 300 Outrigger Mount

Introducing the Grand Slam 300 – a stainless-steel / polished, anodized aluminum, single-handle Outrigger Mount that delivers enhanced safety and performance with smooth, one-handed operation from the deck. Easily adjust rotation and lift of outrigger poles using the GS-300's ergonomic crank handle, which locks flush into the base. The GS-300 pairs with TACO's award-winning Open Water Internal & Collapsible Carbon Fiber Outrigger Poles, as well as Aluminum or Carbon Fiber Tele-Outrigger Poles up to 20' with an underside pin-locking connection – eliminating the need for port and starboard designations.

Skyway Sport Chair

- Features upgraded stainless-steel framing, minimizing deflection
- Features a custom teak back inlay and armrest assembly
- Available with solid teak armrest assembly and hinge cover accent
- Meets ABYC H-31 impact testing requirements
- Upgraded exterior stainless-steel bolster actuating bracket
- Available in a wide variety of color combinations and quilt patterns
- Mounts to any industry standard 5" X 12" slide plate assembly
- Compatible with our M20-1013A/E, mechanical or electric seat slides

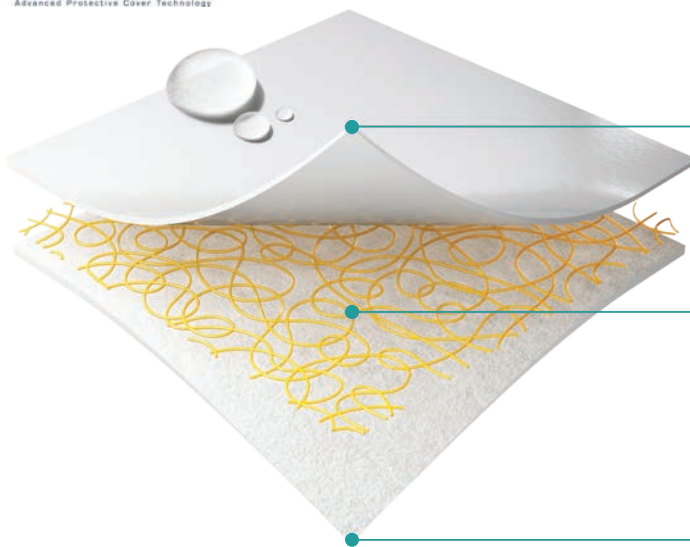

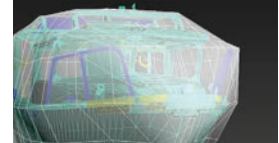

Grand Slam 860 Electric VHF Antenna Mount

The Grand Slam 860 Electric VHF Antenna and Navigation Light Mount combines enhanced safety, durability, and style. As the successor to the popular GS-850, the Grand Slam 860 boasts a robust stainless-steel body and a stainless-steel Type-316L breakaway pin for exceptional weather resistance. It features a new stainless-steel anti-backlash linear screw drive, ensuring greater durability. The mount's oblong shape allows for a longer, more powerful motor – delivering superior performance at sea. Boaters can easily adjust their VHF Antenna from the deck with the push of a button, thanks to the auto-rotating stop feature and manual stop option. This fully electric unit includes a hidden base wire for a sleek installation on the hardtop and uses a water-sealed Deutsch connector for wiring. It retains the same hole pattern as the GS-850, facilitating straightforward upgrades, and is compatible with all top thicknesses.

- Standard 1"-14 thread (male) shaft accommodates standard VHF antennas up to 8'
- No under-mount clearance needed
- Stainless-steel threaded screw drive ensures smooth lift and descent
- High-torque, anti-backlash ball-bearing motor
- Oil-lite bronze bushings for smooth operation
- Integrated nylon knob on the stainless-steel breakaway pin allows for manual operation in case of power failure
- Electronic Control Module (ECM) features an industry-standard On-Off-On control switch
- ECM includes a 5A fuse for device protection
- Comes with a 12" wire lead and water-sealed Deutsch connector, using 18-gauge wire from the base
- Operates on 12-volt DC for lift and descent

OUTER LAYER

Water-resistant, durable, and UV-resistant polyethylene film.

ADHESIVE LAYER

Hot melt adhesive containing no solvents, with an optional VCI additive to fight corrosion.

INNER LAYER

Soft, non-abrasive material with moisture-wicking properties.

Discover the Transshield difference through our comprehensive tests, which compare our covers against traditional shrink wrap in installation efficiency, heat resistance, and durability:

Custom-fit Shipping Covers for Boat Manufacturers

Transshield collaborates with boat manufacturers globally to ensure boats are delivered in factory fresh condition using our custom-fit covers, crafted from our patented Shrinkable Fabric®. We employ 3D models provided by our clients or utilize our TranScan Technology for precise scans, designing the perfect fitting covers inside a virtual environment. The designs are then converted to 2D for cutting and assembly, ensuring each cover fits flawlessly.

For 30 years, our approach has drastically reduced warranty claims related to shipping damage. The three-layer composition of our covers offers the ultimate protection: the interior features a soft, moisture-absorbent non-woven material that guards against scratches and corrosion, while the exterior is made of a durable, UV and water-resistant polyethylene film that protects gel coatings and painted surfaces from environmental damage.

Wet Sounds sets the gold standard in marine audio performance, combining unparalleled style and durability. For marine OEMs looking for reliability, superior performance, and distinctive style, Wet Sounds is the trusted partner. When it comes to ensuring clear, high-quality sound even against the backdrop of roaring engines or challenging marine environments, only Wet Sounds delivers the precision and performance that marine manufacturers demand.

AMP Boards

Wet Sounds offers a complete OEM turn-key solution with multiple amplifier configurations to meet your specific system needs. Our package includes OEM amplifiers, the WS-BB-10 Black Box, MRBF Fuse Box, and all necessary harnesses, making our amp boards the ideal plug-and-play option. The assembly comes pre-loaded with model-specific tuning for your audio system, reducing installation time on the line and ensuring accurate system configurations.

- Complete plug-n-play ready
- All necessary harnesses & hardware included
- Available in any amplifier configuration to meet your system requirements
- Pre-loaded DSP tune for your system

WS-BB-10 Audio Black Box

The WS-BB-10 is the heart of the Wet Sounds network system. As the source unit and controller of all amplifier functions, the BB-10 manages the audio signal from its origin all the way to the speakers, ensuring optimal performance at every listening level and providing the highest level of protection to all audio components. This unit can be customized for each model and system configuration, with the ability to be updated via Bluetooth® or USB device.

- AM/FM/Weather band tuner with Bluetooth® streaming and full playback control
- Sirius XM ready, NEMA 2000, 10 Channel/ 5 Zone
- Digital signal processor for variable outputs

Marine Rated Battery Fuse Block

Keep your system's power and ground wiring secure and protected with the WS-MRBF-4. Designed for the most demanding environments, the WS-MRBF-4 will protect your wiring from the battery and provide a 300A total max current protection.

Whether you have a blank slate or late model refresh project, Patrick Marine's Design and Engineering Center can help.

Our one-stop-shop concept affords you the opportunity to explore your options when it comes to every step in the boat building process.

Cut and Sew

Patrick's Cut and Sew group brings together five industry-leading brands that specialize in marine textiles and protective covers, delivering high-quality products such as boat covers, bimini tops, canvas enclosures, and transport covers. With advanced manufacturing capabilities, including computerized patterning, automated cutting, and precision sewing, our brands deliver customizable solutions tailored to OEM specifications. Driven by a highly experienced team, the Cut and Sew group is known for innovation, durability, and superior craftsmanship, making it a trusted partner for top marine brands.

For more than 100 years, Dowco has been a leader in marine innovation. Our capabilities include the design, sourcing and manufacturing of high-quality tops, covers and enclosures specifically designed for the marine industry. Dowco supplies some of the top manufacturers in the industry and provides excellent replacement canvas for our trusted partners.
